

Talent retention and development

Talent development is key to talent retention. We have invested in tools and resources that are designed to empower and inspire employees to direct their own career paths and build a portfolio of transferable skills in the technology industry. We are committed to building a diverse leadership pipeline with a broad spectrum of skills, including the ability to act with integrity and inspire others.

We provide many resources to support employees' career growth and development through a centralized program. Through this program, we offer formal training options, individualized development programs, tools for 360-degree feedback, mentoring, networking, stretch assignments and growth opportunities. Our internal Career Hub supports employee growth by providing personalized development suggestions, such as mentorship and internal opportunities, that align with their skills and development goals.

2030 GOAL

By 2030, 50% of our global workforce and 40% of our global people leaders will be those who identify as women
